

"Reducing operational costs, while maintaining or improving efficiency is always a challenge. After two years of dealing with this FMS system supplied from Collective Intelligence, we now have a clear picture of the overall use and efficiency of our Materials Handling Equipment fleet"

Fred Nyunt, Operations Auditor, Mitsubishi Australia

Investing In Continual Development And Improvement

If you have a unique problem, or an idea to improve a specific business process, then contact our Research and Development (R&D) team today. We have a proven track record in turning unique and original customer and partner ideas into viable business solutions to resolve a specific problem in a live environment.

The R&D team at Collective Intelligence Group (CIG) are responsible for designing, developing and producing all its hardware and software as well as integrating our products with other world class products and systems to deliver the perfect solution for our customers all the time. We work with you from the concept stage through to rollout and even ongoing maintenance to deliver the perfect solution.

- ✓ **If you're looking to do something more efficiently:** Our team will help you gather all the information you need to best understand your problem and requirements and then find the best way to resolve the issue. You need a knowledgeable team who can customise the perfect result.
- ✓ **You have a unique and untried situation:** It's important to understand all your options in order to find the perfect fit. If it makes good business sense to customise a solution, then you need a team that not only knows what's out there, but who can help you understand what's involved and then deliver cost-effectively on its promises.
- ✓ **Other solutions just haven't worked:** In real working environments it's rare that "one size fits all". If your unique situation isn't out of the box, you'll need to come up with a new and innovative way to resolve your business issue.

Our R&D team will create a solution to resolve your problem in the short term and make it adaptable and flexible enough to handle any ongoing changes to your business environment.

Customised Service Offerings Unlocking Hidden Business Intelligence

The CIG R&D teams are able to work with you on any type of customised implementation in a variety of ways to suit your needs. Our projects can utilise any combination of CIG products, third-party products and newly created customisations to deliver your solution. Our team can work with you along any aspect of the project life-cycle including:

- ✓ Creative involvement from project inception through to production.
- ✓ Building complete end-to-end business systems & general development
- ✓ Integration with existing systems
- ✓ Project management
- ✓ Managing and monitoring systems as well as Support and maintenance.

For more information please contact us today and we'll get one of our specialists to contact you.
