

Fleet Management

"In the field we have Collective's systems on our Concrete trucks, Heavy Haulage trucks and Tip trucks. ...They are easy to install and the drivers find them easy to use. ...We capture information about time sheets, deliveries, job acceptance, vehicle condition checklists, fuel and solid understanding of our fleet."

David Eldridge, Information Systems/Fleet Management System, Hazell Bros Group

A Complete Fleet Management Solution

Our total Fleet Management solution uses wireless and the latest mobility technology to enable timely and accurate reporting on the activity and whereabouts of any vehicle, mobile or fixed asset.

The solution is a combination of hardware, communications, and business systems software with intelligent business integration. The solution is modular, so results can be established and then built on. This is the culmination of decades of development and now a sophisticated product suite is available for:

- ✓ Car / Courier Fleet
- ✓ Truck Fleets
- ✓ People Management
- ✓ Fixed Asset Management

Compelling Benefits for Every Level of Management

Our Fleet Management Solution can be developed to suit the specific needs of any business. This enables a constant reporting and monitoring solution of equipment and operator, illustrating the movements of the vehicle and the driver interactions. In the case of a fleet, it can result in major improvements to that fleet's productivity, OH&S standards and financial returns, and provides detail and accountability to Corporate, Management and Employee levels. A selection of benefits includes:

- ✓ **Reduction in Fuel Consumption:** Track fuel usage by route, region or by Geofencing and compare fuel usage per kilometre between vehicles to assist in defining vehicle end of life and servicing requirements
- ✓ **Reduction in Maintenance Costs:** Supplies vehicle activity and load reports to Servicing agents and present a case for less maintenance on some vehicles
- ✓ **Reduction in Compliance Costs:** Monitoring of chain of duty and responsibility through checklisting
- ✓ **Personnel and Asset Tracking:** Including job completions, planned/unplanned downtime, throughput and real-time operational status
- ✓ **Measuring and reporting by quantity:** By sales or movement on specific runs or machines including weight and time
- ✓ **Reminders, Alerts and Checklists:** Operators will be managed, reminded and alerted to urgent information with a driver lock-out system available if required
- ✓ **Real Time, Automated Decision Making:** With a fully featured, dynamic and easy-to-use internet based reporting system, Collective Intelligence can help make effective real-time decisions based on actual operational functions
- ✓ **Plus** Driver licensing, job allocation, messaging, incident reporting, driving events, black box needs, fuel check, time sheeting, position & speed and much more...

Each piece of functionality is designed to improve bottom line results, increase productivity and reduce waste. Regardless of your requirement from a single off-the-shelf unit to a complete multiple asset, multinational customised monitoring solution, Collective Intelligence can help. **Contact us to find out more about how we can improve your Fleet operation.**
